PROFILE

Software Engineer with experience in front-end development and building web and mobile applications across different products. Skilled in React, Next.js, JavaScript, TypeScript, and React Native, with hands-on experience developing features, improving user interfaces, and translating business requirements into practical solutions. Experienced in leading front-end development efforts, working with cross-functional teams, and taking mobile applications through the development, testing, and release process. Also involved in technical knowledge sharing and supporting better development practices within the team.

EDUCATION

Cavite State University - CCAT Campus

Bachelor of Science in Computer Engineering — 2018 - 2023

WORK EXPERIENCES

ASTICOM – Acquiro Solutions and Tech Inc.

Web Developer — May 2026 – Present

- Lead front-end development across multiple web products, providing technical direction and ensuring consistency in development practices and implementation.
- Introduced Git-based version control and GitLab for source code management and team collaboration, improving the development workflow from the previous manual WinSCP-based file deployment process.
- Develop and maintain web applications using React, Next.js, JavaScript, and TypeScript, translating business requirements into scalable and maintainable user interfaces.
- Contribute to the development and enhancement of multiple web products.
- Collaborate with developers and stakeholders to plan, implement, troubleshoot, and improve front-end features across different web applications.
- Conduct web development Brown Bag sessions for the team, sharing technical knowledge, development practices, and relevant web technologies.
- Support the team in establishing and maintaining development standards, promoting more structured and collaborative front-end development practices.

KEEMCHARD TAMIO

SOFTWARE ENGINEER

Scrambled Eggs Software Inc. (Booky)
